Professional Summary

Computer Science undergraduate skilled in Java, Python, Data Structures & Algorithms, React.js, FastAPI, REST APIs, MySQL, and OOPS. Experienced in full-stack development and Machine Learning, with 700+ problems solved on LeetCode and GeeksforGeeks. Skilled in AI/ML integration, Generative AI for building intelligent applications. Seeking a Software Engineer / SDE role to build scalable, efficient software solutions.

Projects

PickWise — LLM Model Recommendation Platform | (Github) Aug 2026 - Present

- Architected a full-stack AI platform using **NLP** to parse project requirements and recommend top AI models by cost, speed, quality, and capability fit, reducing manual model-selection effort by **~80%**.
- Designed a **Python**-based scoring engine integrated with the **Gemini API** to extract structured requirements and generate explainable recommendations across **20+ AI models**.
- Built a responsive **React.js** frontend for model discovery and comparison, integrated with **RESTful FastAPI** endpoints and a **SQLite** database managing 20+ models.
- **Tech Stack:** React.js, JavaScript, Python, FastAPI, SQLite, SQL, Gemini API (LLM/NLP), REST APIs

SnapMind — AI Study Organizer | (Live) | (Github) June 2026 - Aug 2026

- Built a full-stack AI study organizer using **OCR** and **Gemini API** to automatically summarize and tag uploaded screenshots.
- Developed a **FastAPI + SQLite REST** backend with **CRUD** operations for uploads, search, and metadata editing.
- Built a **React** frontend with gallery and search views; deployed using **Vercel** and **Render**.
- **Tech Stack:** React, Python, FastAPI, SQLite, REST APIs, OCR, Gemini API, Vercel, Render.

LRU Cache — Memory & Concurrent Variants| (Github) Aug 2025 - Sep 2025

- Engineered **O(1) cache** using **HashMap + Doubly Linked List**, achieving **>95% cache hit rate** and reducing average lookup time from 12ms to 5ms.
- Implemented adaptive eviction policies, optimizing memory usage by **25%** under **10k+ entry loads**.
- Developed **thread-safe** variant supporting **100+ concurrent requests/sec**.
- **Tech Stack:** Java, Data Structures, Maven, JUnit 5, Git GitHub, Java Concurrency.

Technical Skills

- **Programming Languages:** Java, Python, JavaScript
- **Frontend:** React.js, HTML, CSS
- **Backend:** FastAPI, REST APIs
- **Databases:** MySQL, SQL
- **Tools & Technologies:** Git, GitHub, Claude, VSCode, Vercel, Render, LLM APIs

Education

Uttaranchal University	Aug 2022 - June 2026
Bachelor of Technology in Computer Science	Dehradun, Uttarakhand

Experience

Intern – Slog Solutions | Data Structures & Algorithms June 2023 - July 2023

- Completed a 45-day intensive DSA training, mastering key topics like arrays, linked lists, trees, sorting, graphs.
- Demonstrated a growth mindset by improving coding ranking and accuracy by 40% through rigorous daily practice.
- Built and optimized data structures, improving runtime efficiency by up to 30%

Certifications & Achievements

- Solved **600+ coding problems** on LeetCode, **Top 12.76%** globally.
- Solved **200+ coding problems** on GeeksforGeeks, **Rank 3** institute-wide.
- Secured **477 Rank on LeetCode** Biweekly Contest 176.
- McKinsey Forward Learner 2026: Selected for the prestigious McKinsey Forward Learning Program.
- Web Development (HTML, CSS, JS): Simplilearn.
