Education

Uttaranchal University

Bachelor of Technology in Computer Science, CGPA: 7.85

Sept 2022 – Aug 2026

Dehradun, Uttarakhand

Relevant Coursework

- Computer Architecture
- Database Management
- Computer Networks
- Data Structure
- Algorithms Analysis
- Operating System
- Artificial Intelligence
- OOPS

Experience

Intern – Slog Solutions | Data Structures & Algorithms

June 2023 – July 2023

- Completed a 45-day intensive DSA training, mastering key topics like arrays, linked lists, trees, sorting, graphs.
- Demonstrated a growth mindset by improving coding ranking and accuracy by 40% through rigorous daily practice.
- Built and optimized data structures, improving runtime efficiency by up to 30%

Projects

LRU Cache — Memory & Concurrent Variants | (Github)

Aug 2025 – Sep 2025

- Engineered O(1) cache using HashMap + Doubly Linked List, achieving >95% cache hit rate and reducing average lookup time from 12ms to 5ms.
- Implemented adaptive eviction policies, optimizing memory usage by 25% under 10k+ entry loads.
- Developed thread-safe variant supporting 100+ concurrent requests/sec.
- **Tech Stack:** Java, Data Structures, Maven, JUnit 5, Git GitHub, Java Concurrency.

Order Management REST API | (Github)

Nov 2025 – Dec 2025

- Designed a REST API using a layered controller-service-repository architecture to improve code structure and maintainability.
- Documented 15+ endpoints with Swagger, decreasing frontend integration effort from 3 days to 1.5 days.
- Containerized PostgreSQL with Docker, reducing deployment setup from 2 hours to 10 minutes with 99.9% uptime.
- **Tech Stack:** Java, Spring Boot, PostgreSQL, Docker, JWT, Maven, JUnit.

Cinefy — BookMyShow | (Github)

Apr 2026 – Present

- Developed a BookMyShow-style movie ticket booking system using Java and Spring Boot to manage 10+ entities, supporting 100+ concurrent users during peak loads.
- Built seat booking and locking logic with booking confirmation, cancellation, and payment handling, achieved 99.9% double-booking prevention and <200ms response time with ACID compliance.
- Used DTOs, custom exception handling, and Jakarta Validation to build clean backend APIs, reduced redundant code by 30%.
- **Tech Stack:** Java, Spring Boot, Spring Data JPA, MySQL, Maven, Jakarta Validation.

Programming Skills

- **Programming Languages:** Java, Python.
- **Backend:** Spring Boot, Spring, REST APIs, JPA.
- **Databases:** PostgreSQL, Relational Database Design, SQL.
- **Unit Testing / Build / DevOps:** Git, Maven, Docker, JUnit, GitHub, VS Code.

Certification & Achievements

- Mastered Data Structures and Algorithms — Slog Solutions.
- **Coding Platforms:** Solved over **500+ Coding Problems** across platforms like **LeetCode** and **GeeksforGeeks**.
- Web Development (HTML, CSS, JS) — Simplilearn.
- **McKinsey Forward Learning Program:** Selected for the prestigious McKinsey Forward Learning Program.
